

Celebrating 25 years of Coastal Conservation Partnerships

5th National Conference on Coastal and Estuarine Habitat Restoration

Restoration Outcomes

Celebrating 25 years of Coastal Conservation Partnerships

- From 2005-2009, the Coastal Program has worked to restore, enhance and protect important wildlife habitat for:
 - 591 Threatened, Endangered and Candidate species
 - 466 Migratory bird species
 - 168 Interjurisdictional fish species

Emerging Issues

Celebrating 25 years of Coastal Conservation Partnerships

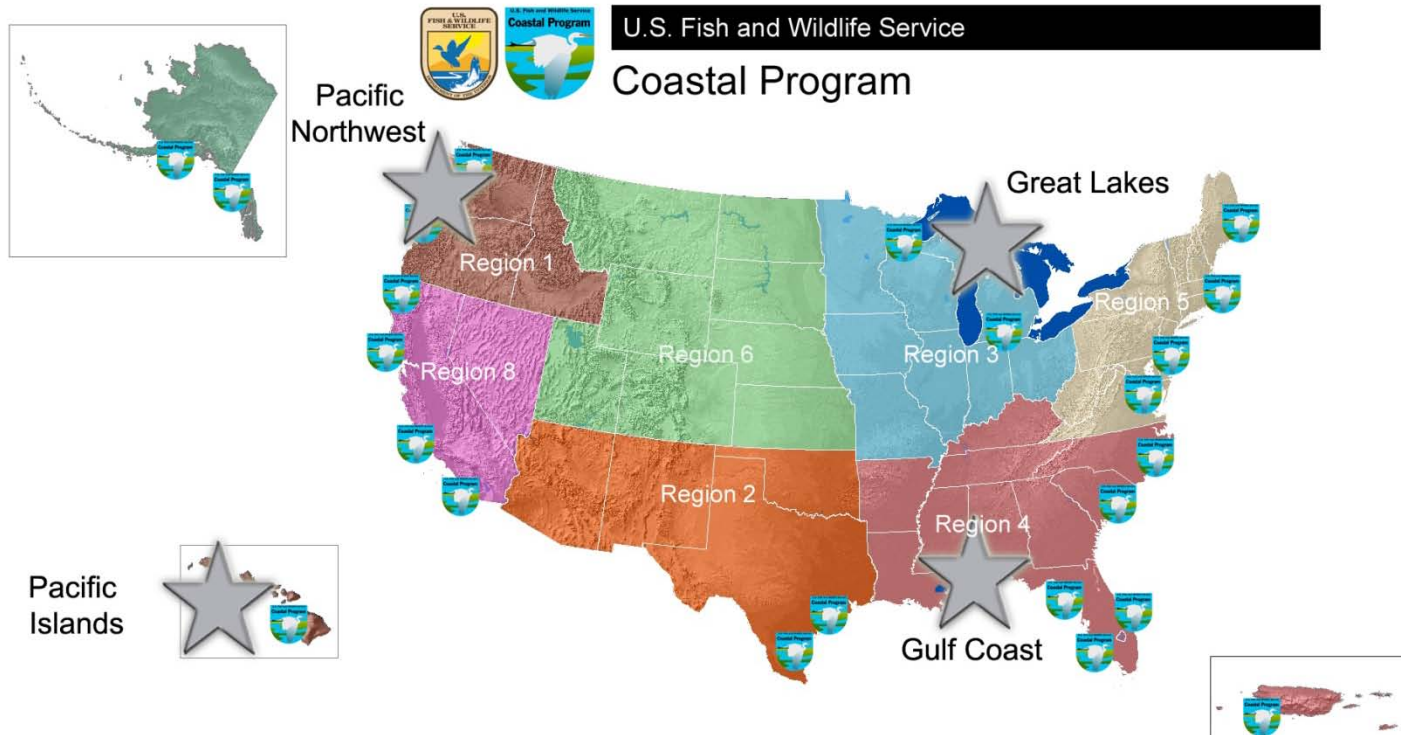

- Climate Change Adaptation
 - Ecosystem resilience
 - Carbon sequestration
 - Sea level rise prediction and mitigation
- Invasive Species
- Coral Reefs

Expanding Habitat Restoration Opportunities

Celebrating 25 years of Coastal Conservation Partnerships

Capacity Building: Expansion of the Coastal Program
